### **EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Ronald Kananen on December 13, 2005.

The application has been amended as follows:

In claim 50, delete the period (".") at the end of the claim and insert a comma (","). After the comma, add "wherein a groove is formed, in said optical lens array, at the boundary between each of said convex shaped optical lens portions and the flat surface of said lens substrate."

In claim 79, delete the period (".") at the end of the claim and insert a comma (","). After the comma, add "wherein a groove is formed, in said optical lens array, at the boundary between each of said convex shaped optical lens portions and the flat surface of said lens substrate."

The following is an examiner's statement of reasons for allowance:

As per the decision by the Board of Patent Appeals and Interference, dated 9/13/2005, the claims recite an intermediate product having nascent, not fully formed, convex portions that are still covered by the mask material.

Art Unit: 2874

Such product and the method of making such product is known in the art. For example, Wakabayashi et al (US 5,316,640) discloses a method for fabricating micro lens, and an intermediate product that has convex portions of the micro lens still covered by the mask material (abstract, Figs. 1(a)-1(e); Figs. 2(a)-2(d)).

However, none of the prior art, including Wakabayashi reference, fairly teaches or suggests such intermediate product wherein a groove is formed between the boundary of each convex portions as claimed in the instant application. The claimed recitation explicitly call for the use of a mask layer in forming the resulting micro lens structure with a groove between the convex portions, and none of the prior art fairly teaches why or how this could be accomplished with prior art inventions.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Sung H. Pak whose telephone number is (571) 272-2353. The examiner can normally be reached on Monday- Friday, 9AM-5PM.

The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
